

## Testimonial

Just wanted to let you know that we have started facilitating two programs of the Five Faces this week and the response has been truly amazing. We did a home visit yesterday with one of the mums from the Monday group (who is also dealing with moving from South Africa) and she was 'buzzing' with excitement. Last night was the beginning of truly inspiring Dads Group, the emotion that was in the room and the enthusiasm that followed was really quite humbling. I was talking to one of the participants this morning and said he was so over come with the wonderful material that you and John have written he feels almost tearful. From my perspective I wanted you know how wonderful it is to work with a program that has been written from the heart and obviously touches the hearts of the people who are participating.
